

QSI OVERVIEW

Brief Overview on QSI

QSI is a Core Investment Manager. Our portfolios, by design, are to be positioned as a core strategy given their structure utilizing ETF's, their low cost, liquidity, transparency and performance. Advisors, who have adapted a "core portfolio" approach to constructing clients investment portfolios find it illustrates to their clients that not only, do they *manage their assets but, are also pro-actively managing the cost of their overall portfolio.*

Why choose QSI over the thousands of other investment strategies?

Our portfolios were specifically designed to be used as a *core strategy* in your clients accounts. Many other ETF strategies are structured with different objectives in mind and are better suited as alternative or satellite investments (and can be easily structured around a QSI core). Our portfolio strategy is ingeniously simple BY DESIGN, to give your clients plenty of reasons to maintain them in positive markets and provide no excuses to disband them during volatile ones.

COSTS- .69bps

Most of our advisors find that their time and the client's fees are better utilized on other investment options that are specifically designed to take advantage of short term market trends and special investment situations. At an overall expense ratio of .69¹ for our strategies, few advisors find it cost effective to manage the portfolio themselves and have the expertise our CFA has in tactical allocation decisions.

THE QSI ADVANTAGE

At QSI, we would be privileged to have the opportunity to assist both you and your client with your goals. Why pay more when you can invest simply with QSI and not sacrifice institutional quality, sophistication, or liquidity. We look forward to assisting you in meeting your short and long term goals!!
